

AK671A Hydraulic Comparator

Product Description

AK671A Hydraulic comparator consists of hand pump, lead screw, shut off valve, F-adjust valve, oil tank and out put interface. It is stable compression and easy operation. It can extensively be used in the field work. It provides pressure for calibrating pressure gauges.

Functions

AK671A provides pressure for calibrating pressure gauges, such as pressure (differential pressure) transducers, precision pressure gauges general pressure gauges and other pressure gauge. It can be widely used in power, chemical, petrol, metallurgy, metering, military, industry etc.

Characteristic

- Easy operation, saving labor
- Fast connection, quick pressurizing.
- Increasing pressure easily, maintenance conveniently
- The appearance is simple & beautiful.

Technical Specification

Pressure Range	(0~600) bar
Stability	0.05%F.S
Working Media	25# Transformer Oil
Output Interface	M20* Female
Overall Dimensions	260mm x 230mm x 125mm
Weight	2.55 kg
