

AK675 Hydraulic Comparator

Product Description

AK675 Hydraulic Comparator is made of hand-pump, lead screw, booster valve, shut-off valve and output interface. It provides required pressure with the whole system by hand pump and use the fine adjustment valve. It is easy to operate and labor-saving according to the hydraulic drive plunger pushing the small one.

Functions

AK675 provides pressure for calibrating pressure gauges, such as pressure (differential pressure) transducers, precision pressure gauges, general and other pressure gauge.

Characteristics

- It has secondary oil filter and settler.
- The waste oil can be filtered by this duplex tank.
- Stainless steel and easy operation.
- It calibrates 1 piece of gauge at one time.

Technical Specification

Pressure Range	(0~1600)bar, (0~2500)bar
Stability	0.05%F.S
Working Media	Diisooctyl sebacate (Dos Product)
Output Interface	M20x1.5 Female
Overall Dimensions	(L x W x H): 570mm x 490mm x 195mm
Weight	25kg
