

AK673A Pneumatic Comparator

Product Description

AK673A Pneumatic Comparator is made up of lead screw, relieve vale, reverse valve and output interface. It features high sealed Performance, stable pressure generating and simple operation. It is suitable in the laboratory and fieldwork. It can supply the pressure for the calibrating pressure (differential pressure) transmitter, precision pressure gauge, general pressure gauge and other pressure instruments.

Functions

AK673A provides pressure to calibrating pressure gauges, as pressure (different pressure) transducers, precision pressure gauges and an other pressure gauge.

Characteristics

- Food grade stainless steel, hermetic technology in the military industry.
- Built in air oil separator can discharge the greasy dirt of the inspected instrument
- High accuracy; simple operation; convenient maintenance
- No external pipeline, avoid of the outer environment changing influence.

Technical Specification

Pressure Range	(-0.98~60)bar
Stability	0.05%F.S
Working Media	Air
Output Interace	M20 x 1.5 Female
Overall Dimensions	(L x W x H)325 x 210 x 170mm
Weight	4.5kg
